SAN FRANCISCO, Calif. – June 22, 2022 – CMTA, a [Legence](#) company, has acquired the assets of McCracken and Woodman in the San Francisco Bay Area. This acquisition increases CMTA’s geographic reach, engineering capacity, and ability to provide high-performance design and energy-efficient solutions to clients.

CMTA joined Legence’s roster of companies in 2021, this strengthened their ability to provide integrated energy and sustainability solutions and services for high-performance buildings with a focus on increasing efficiency consumption within the built environment across the United States. McCracken and Woodman will join the platform as part of CMTA to expand services in California.

“I am delighted to welcome the incredible people at McCracken and Woodman to the CMTA family. In addition to their history of providing high-quality design services, they share our mission to create healthier, more sustainable, and more cost-effective buildings,” says Brian Turner, CMTA Managing Principal, California. “I can’t wait to begin working with them to make an impact in California.”

With this addition, CMTA will bring zero energy building design, carbon neutrality, scalable renewable design, and ESG (Environmental, Social, Governance) solutions to the California market. The key markets they serve include K-12, higher education, healthcare, federal and local governmental entities, athletic and recreation facilities, and commercial work.

“We are thrilled to join the CMTA team. Together we will continue to bring innovation, collaborative culture, and quality focused design in California,” says Brian Chuck, Principal, McCracken and Woodman. “I am confident that our collective partnership will do great things for our community moving forward.”

“McCracken and Woodman have always focused on providing quality design and exceptional service to clients and we are thrilled that CMTA shares those values along with their unmatched building science and energy efficiency capabilities” says Marc Woodman, Principal, McCracken and Woodman. “As we worked with CMTA through this process, it was clear that we share the same passion for our industry, our employees, our clients, and our communities. This is the perfect match, and we are very excited for the future as a part of CMTA.”

## About CMTA

CMTA, a Legence company, specializes in creating and maintaining high-performing facilities and energy systems by providing energy solutions, energy consulting and engineering, and performance contracting services. CMTA is recognized as a leader in sustainable facility design and energy efficiency retrofits, often providing performance contracting and consulting engineering services together as part of larger multi-disciplinary comprehensive solutions. For more information, please visit [www.cmta.com](http://www.cmta.com).

## About Legence

Legence, a Blackstone portfolio company, is an Energy Transition Accelerator™ that provides advisory services and implementation focused on financing, designing, building, and servicing complex systems in mission-critical and high-performance facilities. With five decades of expertise in the built environment, Legence has a proven track record of reducing carbon emissions, implementing renewables, lowering utility costs through efficiency consumption, and making systems run better at unmatched speed and scale.
